*Notes* Historically the specialty Maxillofacial Surgeon was gained after graduating from Faculty of Dentistry. Consequently, the educational program included all basic medical specialties: ophthalmology, pediatrics, hynecology, hinoarlaryngology, neurology, general surgery, therapeutics, psychiatry, radiology, oncology, dermatology etc., but it was a little shorter than the program for the Faculty of General Medicine. Nowadays the reforms concerning all high education, and medical education particularly, are held in our country, and new educational programs are at the stage of development at the moment. They are to be discussed and tried from 2012 year.

**Qualifications awarded:** A diploma in General Medicine (6 years) and a Certificate in Maxillofacial Surgery (2 years)

*Notes 1* Alternative Study Path: Alternatively candidates can take a diploma in Dentistry (5 years) and a Certificate in Maxillofacial Surgery (2 years)

### OMFS Specialty Training taken after Path 1 or Path 2

| OMFS training period (years): | 2 |
As the reforms are held in our country and directions are often changed, it is difficult to put them into practice. Russian maxillofacial surgeons fulfill the whole work in clinics of the University and regional hospitals, develop and use in practice new surgical technologies.

Qualification awarded: Maxillofacial Surgeon

Is there a final OMFS qualifying exam? ✔
