ROBOTIC SESSION

Sunday 28 May 2017 16:00 - 17:00

Chairpersons: Giulia Veronesi (Milan/IT), Alper Toker (Istanbul/TR)

Robotic Thoracic Surgery: standards in clinical practice and training

Robotic thoracic surgery has been developing unequivocally around the world. The type and the number of surgical robots are expected to increase in the next years. Although adoption is increasing faster than expected, current situation and potential of robotic thoracic surgery is under debate, as well as the safe and effective training. This session will be attractive for future robotic thoracic surgeons.
